JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

*An Extract of a Letter, written to the Publisher by Mr. J. L.  
about poisonous Fish in one of the Bahama Islands.*

Sir,

I Do herewith send you an account, I lately received from *New-Providence*, one of the *Bahama* Islands, concerning *Fish* there, which is as followeth;

I have not met with any rarities here worth that acceptance, though I have been diligent in inquiring after them: Of those which I have heard of, this seems most remarkable to me. The Fish, that are here, are many of them poysonous, bringing a great pain on their joynts who eat them, which continues so for some short time, and at last with two or three dayes itching the pain is rubb'd off. Those of the same species, size, shapes, colour and taste, are one of them poyson, the other not in the least hurtful: And those that are, are so only to *some* of the company. The distemper to Men never, that we hear of, proves mortal. Doggs and Cats sometimes eat their last. In men that have once had that disease, upon the first eating of fish, though it be those that are wholsom, the poysonous ferment in their body is revived thereby, and their pain increased.

*Thus far the ingenious person from whom I had this relation*, who having been but a very little while upon the Island when he writ this, could not send so perfect an account of this odd Observation, as one could wish, or as I expect to hear from him in answer to some *Quere's* I lately sent him by a Ship bound thither. When his Answer comes to my hand, if there be any thing in it, which may gratifie your curiosity, I shall be glad of that or any other occasion to assure you, that I am, &c.
